

Advancing the management and maintenance of low volume roads across the Northern Periphery

Elearning Package

A suite of four web based elearning lessons based on ROADEX experience, designed to help learning in the workplace and in academic institutions

Lesson 1: Permanent Deformation

Sets out best practice technologies for the design and management of low volume roads in harsh climates

Lesson 2: Roads on Peat

Shares technologies for the construction and maintenance of roads on peat from across the ROADEX area

Lesson 3: Drainage of Roads

Presents good practice strategies for the assessment and improvement of drainage on road networks in cold climates

Lesson 4: Environmental Considerations for Low Volume Roads

Gives guidance on environmental good practice in the construction and maintenance of low volume roads in the Northern Periphery
